MARATHI NIKSHIPTHA

+91 6302463860 marathinikshiptha@gmail.com LinkedIn

OBJECTIVE

An EEE undergraduate with strong core electrical and electronics fundamentals and hands-on project experience, passionate about applying Artificial Intelligence and software tools to develop efficient, real-world engineering solutions

EDUCATION

B tech in EEE, BVRIT Hyderabad College of Engineering for Women — **Expected 2027**
CGPA 6.9/10

Intermediate (MPC), Narayana Junior College, Doctors Colony — **2021 - 2023**
Percentage: 95.7%

SSC, Narayana High School, Vanasthalipuram — **2021**
GPA 10/10

SKILLS

Artifical Intelligence, Prompting, Web Developing & Designing
Programming Languages: Python, C (Basics)
Developer Tools: Git, GitHub, VS Code, MATLAB, Arduino IDE

PROJECTS

PlanetScope – Environmental Data Web Application: Global nominee at the NASA Space Apps Hackathon for designing PlanetScope, a web application that enables users to analyze location-specific environmental parameters such as temperature and air quality. The project demonstrates the effective integration of data-driven insights with web technologies to support environmental awareness and informed decision-making.

Real-Time IoT-Based Data Synchronization Using MQTT: Developed a real-time data sharing system us- ing Arduino, sensors, and MQTT, enabling multiple devices to synchronize sensor readings efficiently and reliably, demonstrating practical IoT communication and low-latency data exchange.

CIRTIFICATES

NASA Space Apps: Workshop, Cirtificate of Winners, GELACTIC PROBLEM SOLVER (Global Nominee Cirtificate)

Microsoft AI Inventers Hub: Artificial Intelligence Inventers Hub

Infosys Springboard: C Programming Course

MATLAB: Signal Processing Onramp, Power Electronics

PROFESSIONAL MEMBERSHIP

- **Team Lead,** NASA Space Apps

ADDITIONAL INFORMATION

Also skilled at

- **Editing:** Graphics, Animation, Video generation
- **Animation:** Rockets, Robotics, Designing
- **Writing:** Articles, Novels, Essays
